*Journal of Liberty and International Affairs is a triannual, open-access, and internationally peer-reviewed journal distributed under the terms of the Creative Commons Attribution License, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. All materials are published under an open-access license that gives authors permanent ownership of their work.*

This is an open-access journal according to:

The publisher and the journal have registered deposit policy with:

Archiving:

Indexed in: SCOPUS, EBSCO, DOAJ, CEEOL, ERIHPLUS, HeinOnline, ANVUR, ProQuest, UGC-CARE List Group II, etc.

*Any views expressed in this publication are the views of the authors and are not necessarily the views of the editors or publisher. Journal of Liberty and International Affairs is committed to freedom and liberty, pluralism, different views, and a public discussion.*

## About the Journal

*Journal of Liberty and International Affairs* is a triannual (3 regular issues per year), international, open-access, and peer-reviewed journal published by the **Institute for Research and European Studies**. The journal also encourages the publication of occasional Special Issues. It welcomes submissions from political sciences, international relations, international law, and related fields. The primary intention is to offer academic and public debate taking into account the following topics: Individual liberty; Libertarianism; Classical / Neoclassical liberalism; Objectivism; Capitalism; Social liberalism; Statism; Anarchism; Minarchism; Democracy; Political Anthropology; International relations and diplomacy; Public and private international law; Geopolitics; Nationalism; Multilateralism; Ideology; Politics and religion; Neo-Ottomanism; Neo-Sovietism; Yugosphere; Propaganda; Regional cooperation; European federalism; EU law and politics; European economic governance; EU foreign and security policy; Competitive federalism; Comparative constitutional law; Human rights and freedoms; Gender studies; Emerging powers (BRICS; Russia; China; India etc.); Transatlantic relations and other related topics, that contribute to the understanding of liberty and international affairs from different angles. It is important to emphasize, that this journal devotes special attention to Europe / EU as a crucial factor in contemporary international affairs. Also, the journal editorial team encourages the submissions that treat Balkan issues, especially the attitude of the Balkan countries towards European integration, and their place within the new international context.

*Journal of Liberty and International Affairs* is oriented towards a wide audience of interested fellow specialists, geared towards informing policy-makers and social workers and engaging students. It is opened to any researchers, regardless of their geographical origin, race, nationality, ideological affiliation, religion, or gender, as long as they have an adequate manuscript. Because the journal addresses a wide range of academics we encourage the presentation of research to be made at a level where it is understandable to a broad audience. The editorial team encourages both established and early career researchers and doctoral students to take part in this journal to stimulate a greater exchange of ideas and knowledge.

*Journal of Liberty and International Affairs* predominantly treats the topics of interest of political sciences, international relations, and international law, but also seeks to provide a quality interdisciplinary platform of debate for scholars and researchers on complementary disciplines, including social sciences and economics. The content of the journal is based on pure academic research, with a tendency to achieve the highest standards of research and publishing. The journal benefits from the contribution of its International Editorial Committee (IEC) composed of experienced, agile, and dedicated scholars and researchers. These scholars and researchers may be affiliated with a University or another academic institution; however, they participate in the IEC on a personal basis. Thus, their decisions are independent, unbiased by scientific or national prejudices, particular individuals, or conflicting interests. The IEC members are expected to: 1) review manuscripts at the request of journal editors; 2) provide second opinions on articles; 3) help identify suitable reviewers; 4) possibly oversee the review process for several articles in a particular stream—choosing reviewer; and 5) contributing to the final publication decision. Thus, the role of IEC members is to advise and support the journal editors, who have responsibility for the content of the journal.

Submitted manuscripts are subjects to initial editorial screening and anonymous peer-review at least by two reviewers. The journal editorial policy requires that each manuscript will be reviewed by individuals who are experienced and experts in the particular field of the submitted manuscript (e.g. political sciences, law, social sciences, or economics).

*Journal of Liberty and International Affairs* is identified by an International Standard Serial Number (ISSN) and each article carries a Digital Object Identifier (DOI) which is a persistent identifier or handle used to identify objects uniquely, standardized by the International Organization for Standardization (ISO). The publisher and the journal have registered a deposit policy with SHERPA/RoMEO. All the articles are freely available online upon publication. They are published under the liberal Creative Commons Attribution 3.0 Unported License (CC-BY). Each article is archived in SSOAR with an assigned URN (Unique Resource Name), which is a persistent identifier (PID) that enables unequivocal and permanent access to the publication and its scientific citation. The author holds the copyright and retains publishing rights without restrictions. Articles that have been accepted, will be published on the website of the journal and may be distributed to other online repositories or the author's pages on Academia.edu. To provide visibility of the published work, the journal is indexed and abstracted in multiple academic repositories and search engines. The journal editors share announcements, news, and related articles about the topic of the journal on Facebook. <https://www.facebook.com/e.JLIA>

## EDITORIAL BOARD

### EDITOR-IN-CHIEF

**Goran Ilik**, PhD, University St. Kliment Ohridski - Bitola, North Macedonia

### MANAGING EDITORS

**Mladen Karadjoski**, PhD, University St. Kliment Ohridski - Bitola, North Macedonia

**Artur Adamczyk**, PhD, Centre for Europe, University of Warsaw, Poland

## SHARING AND PROMOTING YOUR ARTICLE

Sharing research, accomplishments, and ambitions with a wider audience makes you more visible in your field. This helps you get cited more, enabling you to cultivate a stronger reputation, promote your research, and move forward in your career. Sharing your article is an important part of the research.

### General Conditions

- ★ Author's pre-prints on author server or institutional server only;
- ★ Author's post-prints on author's website, departmental website, employer's website, or institutional repository;
- ★ Authors retain copyright;
- ★ Published source must be acknowledged;
- ★ Publisher's version/PDF cannot be used;
- ★ Creative Commons Attribution License 3.0 Unported.

As an author, you benefit from sharing the appropriate version of your article which ensures that:

- ★ Your article makes it more visible, potentially increasing downloads and citations;
- ★ You always receive credit – you need to be cited accurately;
- ★ The integrity of the Scientific Record is not compromised - you should always direct readers to the most up-to-date version of your article - a link to the published journal article.

### Promote Your Article

- ★ Consider search engine optimization and keywords to help readers discover your article;
- ★ Think about promoting your article through social media;
- ★ Decide how you will share your article.

### Suggested Citation

If the article was published online, include the web address of the article, and then place the word "accessed", along with the date on which you accessed the website (written in the format of "month, day, year") in parentheses. Conclude the citation with a period after the parentheses.

Galt, John. "Article Title." *Journal of Liberty and International Affairs* 4 (2018): 48-64. [web address of the article](#) (accessed December 26, 2018).

For an article found in a database, cite it the same way you would an article published online: place the database URL in place of the website URL and cite the date on which you accessed the article.

Galt, John. "Article Title." *Journal of Liberty and International Affairs* 4 (2018): 48-64. [place the database URL](#) (accessed December 26, 2018).

## ARTICLE GUIDELINES

**Article title:** Times New Roman; 14 pt; bold; alignment centered; single-line spacing; All Caps (max. 100 characters with spaces).

**Author details:** Times New Roman; 12 pt; single-line spacing; alignment centered. Please write the author details in the following order:

John Galt  
Ayn Rand University - New York, USA  
ORCID iD: <https://orcid.org/0000>  
E-mail: [galt@rand.uni.edu](mailto:galt@rand.uni.edu)

**Abstract and keywords:** Between 150 and 200 words (5-7 keywords); Times New Roman; 12 pt; single-line spacing; justify. Write your abstract using concise, but complete, sentences. Get to the point quickly and always use the past tense because you are reporting on a study that has been completed. There are four things you need to include: 1) your research problem and objectives, 2) your methods, 3) your key results or arguments, and 4) your conclusion.

**Article text:** Times New Roman; 12 pt; justify; 1.5 line spacing; margins: Top: 2,5 cm; Bottom: 2,5 cm; Left: 3 cm; Right: 3 cm. The scope of submitted text should not exceed more than 30.000 characters (with spaces) including references. The text should be written in the neuter gender, concisely with correct orthography. Latin phrases should be set in *italics*.

**Quotations:** If they are brief (3 lines or fewer), quotations should be run on with the text. Longer quotations should be indented, without quotation marks. All indented quotations should be typed single-spaced.

**Citation style:** The author should follow Chicago Style (author-date system) for referencing, for example: (Dahl 1989, 45); (Geddes 1999, 134-43); (Linz 1975). All references should be given in full at first mention. Subsequent citations can be abbreviated. Footnotes should be kept to a minimum.

**Headings and subheadings:** Times New Roman; 12 pt; bold.

**Tables:** Times New Roman; bold; size 10; align heading left; single line spacing. Tables must be created in Word, not Excel. The table heading is situated above the table.

**Figures:** Times New Roman; bold; size 10; alignment centered; single line spacing. The authors must submit original electronic copies of the figures applied in the article in TIFF, JPG, or PNG format. Figure heading is situated under the figure. Consider aligning tables and figures at the center.

**Dates:** Dates should be given in the form: 26 December 1981.

**References:** The reference list appears at the end of your article, and provides more detailed information about the sources you cited. Each entry in the reference list also begins with the author's last name and the publication date, so that your reader can easily find any source they encounter in the text. For four or more authors, list all of the authors in the reference list; in the text, list only the first author, followed by *et al.* It is alphabetized by the author's last name.

## PUBLICATION ETHICS

*Journal of Liberty and International Affairs* is determined to publish original work of value to the academic community in the best possible form and to the highest possible standards. We expect similar standards from our reviewers and authors. Honesty, originality, and fair dealing on the part of authors, and fairness, objectivity, and confidentiality on the part of editors and reviewers are among the critical values that enable us to achieve our aim. The journal fully accepts and behaves in accordance with the [Core Practices](#) established by the *Committee on Publication Ethics* ([COPE](#)) and is available free of charge on its website. For all parties involved in the act of publishing (the author, the journal editors, the reviewers, and the publisher) it is necessary to agree upon standards of expected ethical behavior. The ethics statements for *the Journal of Liberty and International Affairs* are based on [COPE Best Practice Guidelines for Journal Editors](#).

### EDITOR RESPONSIBILITIES:

#### Accountability

The editor of a peer-reviewed journal is responsible for deciding which articles submitted to the journal should be published, and, moreover, is accountable for everything published in the journal. In making these decisions, the editor may be guided by the policies of the journal's editorial board as well as by legal requirements regarding libel, copyright infringement, and plagiarism. The editor may confer with other editors or reviewers when making publication decisions. The editor should maintain the integrity of the academic record, preclude business needs from compromising intellectual and ethical standards, and always be willing to publish corrections, clarifications, retractions, and apologies when needed.

#### Fairness

The editor should evaluate manuscripts for intellectual content without regard to race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or political philosophy of the author(s). The editor will not disclose any information about a manuscript under consideration to anyone other than the author(s), reviewers and potential reviewers, and in some instances the editorial board members, as appropriate.

#### Confidentiality

The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

#### Disclosure, conflicts of interest, and other issues

The editor will be guided by COPE's Guidelines for Retracting Articles when considering retracting, issuing expressions of concern about, and issuing corrections pertaining to articles that have been published in *the Journal of Liberty and International Affairs*.

Unpublished materials disclosed in a submitted manuscript must not be used in an editor's own research without the express written consent of the author. Privileged information or ideas obtained through peer review must be kept confidential and not used for personal advantage.

The editor is committed to ensuring that advertising, reprint, or other commercial revenue has no impact or influence on editorial decisions. The editor should seek to ensure a fair and appropriate peer-review process. Editors should recuse themselves (i.e. should ask a co-editor, associate editor or other members of the editorial board instead to review and consider) from considering manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with

any of the authors, companies, or (possibly) institutions connected to the articles. Editors should require all contributors to disclose relevant competing interests and publish corrections if competing interests are revealed after publication. If needed, other appropriate action should be taken, such as the publication of a retraction or expression of concern.

### **Involvement and cooperation in investigations**

Editors should guard the integrity of the published record by issuing corrections and retractions when needed and pursuing suspected or alleged research and publication misconduct. Editors should pursue reviewer and editorial misconduct. An editor should take reasonably responsive measures when ethical complaints have been presented concerning a submitted manuscript or published article.

## **REVIEWER RESPONSIBILITIES:**

### **Contribution to editorial decisions**

Peer-review assists the editor in making editorial decisions and, through the editorial communication with the author, may also assist the author in improving the manuscript.

### **Promptness**

Any invited referee who feels unqualified to review the research reported in a manuscript or knows that its timely review will be impossible should immediately notify the editor so that alternative reviewers can be contacted.

### **Confidentiality**

Any manuscripts received for review must be treated as confidential documents. They must not be shown to or discussed with others except if authorized by the editor.

### **Standards of objectivity**

Reviews should be conducted objectively. Personal criticism of the author is unacceptable. Referees should express their views clearly with appropriate supporting arguments.

### **Acknowledgment of sources**

Reviewers should identify relevant published work that has not been cited by the authors. Any statement that an observation, derivation, or argument had been previously reported should be accompanied by the relevant citation. A reviewer should also call to the editor's attention any substantial similarity or overlap between the manuscript under consideration and any other published data of which they have personal knowledge.

### **Disclosure and conflict of interest**

Privileged information or ideas obtained through peer review must be kept confidential and not used for personal advantage. Reviewers should not consider evaluating manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions connected to the submission.

## **AUTHOR RESPONSIBILITIES:**

### **Reporting standards**

Authors reporting results of original research should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in

the manuscript. An article should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable.

### **Originality and Plagiarism**

The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted.

### **Multiple, redundant or concurrent publication**

An author should not, in general, publish manuscripts describing essentially the same research in more than one journal or primary publication. Parallel submission of the same manuscript to more than one journal constitutes unethical publishing behavior and is unacceptable.

### **Acknowledgment of sources**

Proper acknowledgment of the work of others must always be given. Authors should also cite publications that have been influential in determining the nature of the reported work.

### **Authorship of a manuscript**

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be named in an Acknowledgement section. The corresponding author should ensure that all appropriate co-authors (according to the above definition) and no inappropriate co-authors are included in the author list of the manuscript and that all co-authors have seen and approved the final version of the article and have agreed to its submission for publication.

### **Hazards and human or animal subjects**

If the work involves chemicals, procedures, or equipment that have any unusual hazards inherent in their use, the authors must clearly identify these in the manuscript.

### **Disclosure and conflicts of interest**

All authors should disclose in their manuscript any financial or other substantive conflicts of interest that might be construed to influence the results or their interpretation in the manuscript. All sources of financial support for the project should be disclosed.

### **Fundamental errors in published works**

When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal's editor or publisher and cooperate with them to either retract the article or to publish an appropriate erratum.

### **PUBLISHER'S CONFIRMATION:**

In cases of alleged or proven scientific misconduct, fraudulent publication, or plagiarism the publisher, in close collaboration with the editors, will take all appropriate measures to clarify the situation and to amend the article in question. This includes the prompt publication of an erratum or, in the most severe cases, the complete retraction of the affected work.

## COMPLIANCE WITH ETHICAL STANDARDS:

To ensure objectivity and transparency in research and to ensure that accepted principles of ethical and professional conduct have been followed, authors should include informed consent if the research involved human participants, and a statement on the welfare of animals if the research involving animals. Authors\* should include the following statements (if applicable) in a separate section entitled "Compliance with Ethical Standards" before the References when submitting an article:

- ★ Research involving Human Participants and/or Animals Informed consent.
- ★ Informed consent.

The authors should specifically mention if a waiver was obtained for the study and the reason for the waiver. They should confirm that the study was conducted following the [Declaration of Helsinki](#) and its later amendments or comparable ethical standards.

## Acknowledgments

Anyone who does not meet the authorship criteria, such as people who provided technical help, institutional/department heads who provided general support, or medical writers who assisted with the preparation of the article content, should be acknowledged. Even if the authors have no one to acknowledge, the journal expects authors to include this section in the article and write "Not applicable."

## Funding

All sources of funding for the research work and their role (if at all) in the design of the study and collection, analysis, interpretation of data, and in writing the article should be declared. Provide the name(s) of the funding agency/agencies along with the grant number(s). If the study did not receive any funding, the journal expects authors to include this section in the article and write "Not applicable."

## RESEARCH INVOLVING HUMAN PARTICIPANTS AND/OR ANIMALS:

### Statement of human rights

When reporting studies that involve human participants, authors should include a statement that the studies have been approved by the appropriate institutional and/or national research ethics committee and have been performed in accordance with the ethical standards as laid down in the [Declaration of Helsinki](#) and its later amendments or comparable ethical standards. If doubt exists whether the research was conducted in accordance with the [Declaration of Helsinki](#) or comparable standards, the authors must explain the reasons for their approach, and demonstrate that the independent ethics committee or institutional review board explicitly approved the doubtful aspects of the study.

*The following statements should be included in the text before the References section:*

**Ethical approval:** "All procedures performed in studies involving human participants were in accordance with the ethical standards of the institutional and/or national research committee and with the Declaration of Helsinki and its later amendments or comparable ethical standards."

**For retrospective studies, please add the following sentence:** "For this type of study, formal consent is not required."

### Statement on the welfare of animals

The welfare of animals used for research must be respected. When reporting experiments on animals, authors should indicate whether the international, national, and/or institutional guidelines for the care and use of animals have been followed and that the studies have been approved by a research ethics committee at the institution or practice at which the studies were conducted (where such a committee exists).

*For studies with animals, the following statement should be included in the text before the References section:*

**Ethical approval:** "All applicable international, national, and/or institutional guidelines for the care and use of animals were followed."

**If applicable (where such a committee exists):** "All procedures performed in studies involving animals were in accordance with the ethical standards of the institution or practice at which the studies were conducted."

**If articles do not contain studies with human participants or animals by any of the authors, please select one of the following statements:**

- ★ "This article does not contain any studies with human participants performed by any of the authors."
- ★ "This article does not contain any studies with animals performed by any of the authors."
- ★ "This article does not contain any studies with human participants or animals performed by any of the authors."

### Informed consent

All individuals have individual rights that are not to be infringed. Individual participants in studies have, for example, the right to decide what happens to the (identifiable) personal data gathered, to what they have said during a study or an interview, as well as to any photograph that was taken.

Hence it is important that all participants gave their informed consent in writing prior to inclusion in the study. Identifying details (names, dates of birth, identity numbers, and other information) of the participants that were studied should not be published in written descriptions, photographs, and genetic profiles unless the information is essential for scientific purposes and the participant (or parent or guardian if the participant is incapable) gave written informed consent for publication.

Complete anonymity is difficult to achieve in some cases, and informed consent should be obtained if there is any doubt. If identifying characteristics are altered to protect anonymity, such as in genetic profiles, authors should provide assurance that alterations do not distort scientific meaning.

The following statement of the corresponding author should be included in the text before the References section:

**Informed consent:** "Informed consent was obtained from all individual participants included in the study."

**If identifying information about participants is available in the article, the following statement should be included:** "Additional informed consent was obtained from all individual participants for whom identifying information is included in this article."
